## Project Design Phase-II Data Flow Diagram & User Stories

Date	03 October 2022	
Team ID	PNT2022TMID45454	
Project Name	Project – Web Phishing Detection	
Maximum Marks	4 Marks	

## **Data Flow Diagrams:**

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

## **User Stories**

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Customer (Mobile user)	Registration	USN-1	As a user, I can register for the application by entering my email, password, and confirming my password.	I can access my account / dashboard	High	Sprint-1
		USN-2	As a user, I will receive confirmation email once I have registered for the application	I can receive confirmation email & click confirm	High	Sprint-1
		USN-3	As a user, I can register for the application through Facebook	I can register & access the dashboard with Facebook Login	Low	Sprint-2
		USN-4	As a user, I can register for the application through Gmail	3	Medium	Sprint-1
	Login	USN-5	As a user, I can log into the application by entering email & password		High	Sprint-1
	Dashboard					
Customer (Web user)  Customer Care				I can go access the website without any	High	Sprint-1
	User input	USN-1	As a user I can input the particular URL in the required field and waiting for validation.	problem As a user I can have	High	Sprint-1
	Feature extraction	USN-1	After I compare in case if none found on	comparison between websites for security.	Figii	Sprint-1
Executive Administrator	Prediction	USN-1	comparison then we can extract feature using heuristic and visual similarity approach.  Here the model will predict the URL websites	In this I can have correct prediction on the particular	High	Sprint-1
Auministrator	Classifier	USN-2	using Machine Learning algorithms such as Logistic Regression, KNN. Here I will send all the model output to	algorithms  In this I will find the correct classifier for producing the result	Medium	Sprint-2
	Cidodillo	JOIN Z	classifier in order to produce final result	Todat
